A Department-approved quarantine holding area must meet the following conditions:

1. The floor of the quarantine holding area shall be composed of a permeable surface, such as sand or soil, and shall be free from debris, grass and weeds.
2. An outdoor quarantine holding area shall be at least 15 feet from all masonry walls, property boundaries and non-quarantined plants.
3. The quarantine holding area shall be isolated from public access, and surrounded by a fence or other barrier.
4. The integrity and security of the holding area shall be maintained at all times.

All regulated commodities as described in R3-4-239 shall be unloaded at destination in a Department-approved quarantine holding area and held undisturbed until the Department confirms the regulated commodities are free of pests and a certificate of release is issued.

The applicant shall immediately notify the Department and request an inspection upon the receipt of a regulated article as described in R3-4-239.

A receiver shall apply a pesticide or other chemical to a regulated commodity located in a quarantine holding area only when directed or supervised by a Department inspector.

Failure to meet the conditions above may result in the removal or revocation of a Department-approved quarantine holding area.
