INTEROFFICE MEMORANDUM

DATE: October 17, 2011
TO: Jack Peterson, Acting Director
FROM: Vince Craig, Compliance Manager
RE: Finger Printing and Termite reporting fees

At the last TASK Force Meeting, the issues of finger printing license applicants as well as the validity of requiring business license holders to report and pay for termite actions was discussed.

You directed OPM staff to inquire with other States to determine if our processes were similar others.

I successfully communicated with fourteen State representatives.

The back of this memorandum contains a chart of their responses to the following two questions:

- #1. Does your state agency perform FINGER PRINTING / BACKGROUND CHECKS on the applicants who desire to obtain a license to apply pesticide?
- #2. Does your state agency charge a fee whenever a company performs a termite treatment or any other pesticide application?
