

Arizona Department of Agriculture
Livestock and Crop Conservation Grant Program (LCCGP)

PROJECT OVERVIEW MAP AND ASSOCIATED PHOTOS

Outline where the project will take place on the map(s) included with your application and provide section/township/range coordinates. Include maps that are appropriate to your project so the grant evaluators will be able to clearly understand where your project is located on the operation, the surrounding topography, the type of rangeland and what's around the project site (i.e. is it close to a town, next to a USFS allotment, nearby a highway etc.).

Make sure your maps precisely illustrate the project to give the evaluators a clear understanding of what you are planning to do. You may contact your local Natural Resources Conservation Service (NRCS) or Forest Service offices to obtain maps. Also see mapping website resources in Appendix A. The project/topographical map should be in a 1:24,000 scale. Include state or federal permit/lease allotment maps.

You are required to provide additional drawings and/or photographs describing the project site.

Whenever possible, project maps should be 8.5" x 11". However, if you feel a larger map better illustrates your project, you may include it, but please keep all maps a reasonable size.

Maps and associated photos should be organized and labeled, then formatted into a PDF document. The PDF document will be uploaded in the application package. **Maximum file size is 5 MB.**
